---

## Achievements

- Managed to become an instructor for new joiners with managing a team of 5 junior android developers.
- Star Performer** Recognized for exceptional performance in the year 2022/23, achieving top rankings among a team of 50+ professionals.
- Featured on ANR's corporate channels and recognized as one of the pillars behind the company's success, reaching over 10,000 viewers and stakeholders.
- Managed and delivered 9+ complex projects at ANR, leveraging technical expertise to ensure seamless execution and timely completion, resulting in a 20% increase in client satisfaction and repeat business

## Core Competencies

- Project Leadership
- Public Speaking
- Agile Product Development
- ERP Application Development
- Team Collaboration
- Client Engagement
- Design Feature Documents
- Mentoring & Training
- Technical Writing
- Scrum Methodologies

## Skills & Tools

Language	Java, Kotlin, Javalin, Android SDK, RxJava
Framework & Tools	Android framework, Android Studio, MVVM, SQL with ROOM, Retrofit, Background Services, Firebase, Jetpack Compose, Git, Github, CI/CD, Glide/Picasso,
Applications	SQL lite, ROOM, Third Party SDK integration, Bluetooth, Sensors

## Professional Experience

**Android Developer** | ANR Software Pvt Ltd      April 2021 – Present

- Backend Development:** Implemented several functionality with use of custom foundation library, improving code quality and implementation speed.
- Client Engagement:** Maintained a client-facing role for over 9 months, leading 15+ feature demonstrations and discussions, as a result, achieving a 20% enhancement in client satisfaction.
- Android Version Upgrades:** Directed the version upgrade of 10+ apps, ensuring new functionality works flawless on newer android versions with increased client interactions.
- Streamline Documentation Process:** Improved feature documentation process, reducing minor queries by 40% and clarifications by 35%.
- Background Service Integration:** Integrated use of services to achieve greater loading speed and offline data management, improving storage management efficiency by 50%.
- Mentoring:** Mentored over 10 new joiners in Android technology and basics of Java, delivering more than 160 hours of training on Android technical and functional aspects, debugging practices, and best practices for development and unit testing.

**Android Developer (Trainee)** | Shoocal India Ltd      Jan 2021 – Apr 2021

- Developed features like view pager with enhanced code stability, boosting user engagement by 25% and increasing sales by 20%.
- Wrote JUnit and Espresso test cases increasing application run time and reducing product delivery time.
- Provided customized technical insights to clients during pre-sales engagements, achieving a 40% conversion rate of leads into clients.

## Projects

**Plum Clock | Android Framework, Background Services, ROOM, GIT**      Feb 2023 – On Going

- Spearheaded backend development for restaurants to manage their employees shift, focusing on feature optimization, version scaling, and customization.

- Use of Background services with room databases enabling clients to work offline without any hassle.
- Wrote Javalin server inside the app enabling multi-device offline functionality with data transfer optimization increasing app run-time performance and decreasing app size.
- Use of CameraX Library for facial recognition enabling users to login with their biometrics such as face.

### **ZipInventory | Android SDK, Java, Rest Api, Custom Views**

**Dec 2021 - On Going**

- Inventory management enabling client to manage inventory more efficiently resulting in increased sales with less wastage.
- Implemented invoice generating modules consuming rest api with attachment feature enabling users to attach photos in an invoice.
- Made Custom view reducing app size and increasing app run-time performance, resulting in increased user experience.

### **ZipHACCP | Android Sensors, Bluetooth Le, Rest API**

**Mar 2022 - On Going**

- Probe functionality with Bluetooth Le connectivity to measure food temperature.
- Implemented voice search modules.
- Made Custom dialog to input temperature with custom dialog and bluetooth connectivity.

### **ZipSchedule | Android, Rest API**

**Mar 2022 - On Going**

- Employee schedule management with create shift functionality, improved code quality with implementing modern architecture MVVM pattern.
- Improved code quality with more robust and flexible code, improving searching algorithms and inheritance concepts..

### **ZipClock | Android, Rest API, Google Maps**

**Apr 2023 - On Going**

- Scheduled employees can clock in using maps feature which records current location.
- Improved code quality with more robust and flexible code, improving searching algorithms and inheritance concepts..

## **Education**

Msc Computer Science

Lovely Professional University, Punjab, India
